

The Importance of International Cooperation under Disruptive Changes

Recommendations and Lessons Learnt from a Fruitful German-Japanese Dialogue on the Energy Transition

Monday, 10th September 2018

Institute of Energy Economics, Japan (IEEJ), Tokyo

Background

In the face of the rather unambitious global implementation of the Paris Agreement, the vivid – and sometimes also controversial dialogue – of leading industrial nations, such as Germany and Japan, is becoming more important than ever. Especially in sensitive areas such as climate and resource protection, cooperative knowledge exchange can accelerate the necessary developments.

Since its foundation in May 2016, the German-Japanese Energy Transition Council (GJETC) has been working on strategic and systemic analysis to develop policy advice for new and long-term perspectives on the way to an ambitious energy transition. Common challenges have been identified and differences in perception, notions and framework conditions have been discussed.

The GJETC is an experiment on the intensification of bi-national scientific dialogue. This experiment is based on the conviction that joint solutions can be found, but only if diverging interests, motivations and values of the partners are transparent, clearly articulated and mutually respected.

German and Japanese representatives of the Council are going to share their experiences and recommendations and discuss the pros and cons of such bi-national institution as well as ideas for future endeavors.

Language

German and Japanese (simultaneous translation)

Organized by

Program

13:00 Admission & Registration

Moderation: Hisashi Hoshi, IEEJ

13:30 Opening & Greeting Address

Kazushige Tanaka, Director of the International Affairs Division, Agency for Natural Resources and Energy (ANRE), Ministry of Economy, Trade and Industry (METI)

13:45 2 years of bi-national cooperation in the GJETC –

Recommendations & Critical Assessment of the Energy Transition in Germany and Japan

Peter Hennicke, Former President of Wuppertal Institute, Co-Chair of GJETC

Masakazu Toyoda, Chairman & CEO, Institute of Energy Economics Japan, Co-Chair of GJETC

14:15 Panel Discussion: „Germany and Japan as Role Models for the Global Energy Transition?“

Moderation:

Moderation: Yukari Yamashita, Researcher, IEEJ

Panelists:

Peter Hennicke, former president of Wuppertal Institute, Co-Chair of GJETC

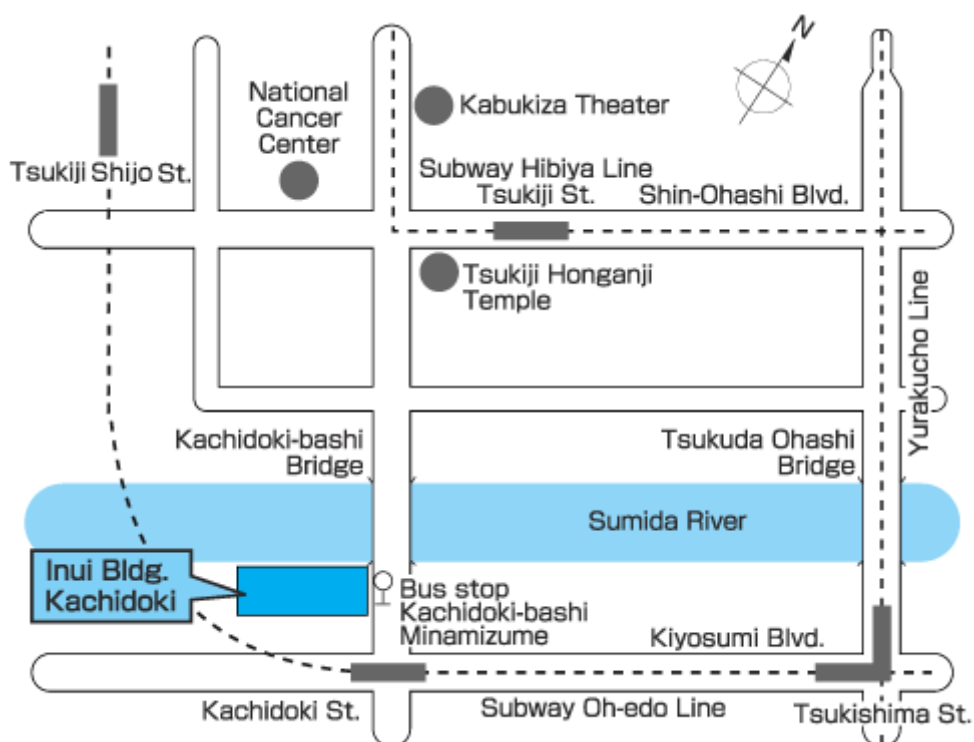

Masakazu Toyoda, Chairman & CEO, The Institute of Energy Economics, Co-Chair of GJETC

Jun Arima, Professor for Energy and Environmental Policies, Tokyo University

Torsten Bischoff, Head of Corporate Communications and Energy Policy, Trianel GmbH

15:00 End

Venue

Institute of Energy Economics, Japan (IEEJ)

Inui Building, Kachidoki
Conference room, 10th/11th Floor
13-1, Kachidoki 1-chome, Chuo-ku,
104-0054 Tokyo
